Standard Specification

Hullform And Construction

All gel coat and glass fibre hand laid with unidirectional, biaxial and woven rovings Antifouling protection to hull

Deep 'V' forward; 20° deadrise aft

Designed by Bernard Olesinski and the Fairline design team

Full length moulded spray deflectors

Hull/deck join bolted and bonded

Integrally moulded engine bearers

Isophthalic gel coat backed by isophthalic resin-rich powder-bound glass mat

The deck incorporates polyurethane foam cores for high strength and excellent thermal insulation

The integral bathing platform gives the boat a longer waterline length for improved performance, particularly at reduced power settings

The propellers are set in semi-tunnels enabling the engines to be located further aft, also reducing draught and improving efficiency by reducing the shaft angle

Transverse and longitudinal strengthening stringers throughout hull
